For Your Information:

There is a break in continuity twice on Side 1. The side starts with material of 9 January. At about 5 on the scale the words come through: "We're back on again." <sup>p. 34 of transcript</sup> This is the continuation of material from Side 2. This goes to about 40 <sup>p. 44 of transcript</sup> and ends: "I'll tell you one thing; I should go off the air." Then the real Side 1 comes back with: "Detailed technical photography and other types of intercept from the satellites..."

This is just to explain why the thing sounds disjointed.
